PROFESSIONAL EXPERIENCE

MERN STACK INTERN

- Frontend Development:** Implementing user interfaces using React.js, HTML, CSS, and Bootstrap, creating reusable components, and managing state with hooks and Redux.
- Backend Development:** Developing backend logic with Node.js and Express.js, creating RESTful APIs, and handling server-side operations.
- Database Management:** Designing and managing MongoDB databases, performing CRUD operations, and optimizing queries for efficiency.
- Code Quality & Collaboration:** Writing clean, efficient, and well-documented JavaScript code, ensuring responsive design, conducting code reviews, debugging, and collaborating with cross-functional teams to deliver new features.

PROJECTS

BLOGGING WEBSITE

Dive into the world of blogging with this dynamic website built on the MERN stack. Users can easily create, manage, and share their blogs, become administrators to control their content, and allow visitors to browse and enjoy a variety of blogs.

QUIZ WEB APPLICATION

This quiz app offers real-time feedback, highlighting correct and incorrect answers, and provides a result summary with an option to restart. Users must complete each question before moving to the next.

TODO WEB APPLICATION

created a ToDo application from scratch using ReactJS to streamline task management. Users can effortlessly add, delete, and update tasks, view incoming and completed tasks separately, and benefit from data persistence through local storage.

CERTIFICATIONS

- Introduction to Python programming by Infosys
- Problem-Solving (Basics) by Hacker Rank
- Learn and Master C Programming For Absolute Beginners by Infosys
